SOFTWARE DEVELOPER ASSOCIATE

Experienced in Ruby on Rails and JavaScript based programming with a background in Finance. Through my multiple rotations at PNC, I possess strong skills in communication and project management with internal and external customers. I was relied upon to learn complex concepts and problems quickly and help implement them with the team.

TECHNICAL SKILLS

Ruby, Rails, JavaScript, React.js, Redux, HTML, CSS

TECHNICAL PROJECTS

Capitall - [Github](#) ([Backend](#) / [Frontend](#)) | [Demo](#)

Application that allows the user to track financial transactions, accounts, budgets, saving goals, and bills for people to achieve their financial goals.

- Utilized JSON Web Tokens and localStorage to store encrypted user information client-side.
- Built with React.js component structure to render a seamless experience for the user moving between pages.
- Used React Redux for state management that allows the profile to render quickly upon user login.
- Implemented React Router for client-side routing.

Local Voyage – [Github](#) ([Backend](#) / [Frontend](#)) | [Demo](#)

Application allows the user to list hotels, landmarks, restaurants, and the best dishes in those restaurants for travel planning and to share with friends.

- Integrated Google Maps API for the user to see where the location is and how it may look from the street.
- Implemented Google Places API for the convenience of seeing suggested places and their address to appear when searching for location.
- Utilized Rails validations to protect the database from false data entries that may cause unpredictable behaviors.
- Used Bcrypt gem to safely store encrypted passwords of all users using a hashing algorithm.

Market Place - [Github](#) | [Demo](#)

Application designed to serve as a virtual marketplace that allows users to post, view and buy items from other users that are for sale. This platform allows users to get contact information from the seller to contact them directly if interested in purchasing their item.

- Built with server-side routing in Ruby on Rails.
- Utilized ActiveStorage to provide the ability for users to upload images to each item listed for sale.
- Implemented Devise gem for user authentication and ability to reset password using email.
- Created using the MVC architectural pattern.

EXPERIENCE

PNC Bank

Chicago, Illinois

Business Banking Associate Relationship Manager

06/2018 - 10/2020

- Support five bankers in Chicago through assisting in face-to-face contact, documentation, and new account onboarding.
- Assist in implementation of new technology tools such as Salesforce on our team to increase efficiency.
- Prospect for potential new clients through cold calling and networking to provide financial solutions such as business loans, credit card processing, and deposit accounts.

ACCEL Retail Development Associate

- Rotate through all nine sectors of the Retail bank in order to provide exceptional customer service.
- Selected as Steering Committee market lead to gather feedback from candidates on the program for improvement.
- Assisted up to ten personal and business clients a day in all their financial needs such as saving for retirement, mortgage, and fraud mitigation.
